

Dear Parent / Carer,

As part of your child's education at Outwood Junior Academy Brumby, this half term we are studying the life cycle of humans as part of our 'Animals including humans' unit in science. In the week beginning Tuesday 2nd May, we are going to focus on puberty. This will provide the opportunity for children to learn about the main physical and emotional changes that happen.

All topics covered in the sessions are specific and relevant to the age and development of children and much of the content is what is required by the National Curriculum for:

- Science
- Relationships and Sex Education.

Children will revisit and develop their learning in these areas. As we are aware that this may be a sensitive area to some of you, we are notifying you now that your child will be focusing their learning in this area over the next few weeks. Any parent who may have questions and / or issues with their child participating in such sessions is strongly encouraged to come along and talk to your child's class teacher about the content and delivery of the sessions. Alternatively, you may wish to make an appointment to speak to myself.

Thank you for your cooperation.

Yours sincerely

Miss L Pike
Year 5 Phase Leader
